

## TrapTester Training Course (18-19-20th September 2007)

Badley Geoscience Ltd. are pleased to announce a public TrapTester training course which will be held in our offices in Lincolnshire from the 18th to 20th September.

With our software increasingly in use in industry, the demand for training is at an all time high. Our TrapTester software training course aims to deliver all the knowledge needed to integrate TrapTester into your every-day work environment. The courses are designed for geoscientists, explorationists and reservoir engineers who are interested in fault trap analysis. The main objectives are to show you how to use TrapTester for framework model building and fault seal analysis through hands-on interaction, and how to apply geological criteria to evaluate and risk traps.

The total cost of this 3-day course is £1000 + VAT (17.5%) per person. According to UK Government Regulations, VAT has to be charged on all courses held in the UK, even if participants are based overseas. It may, however, be possible for your company to reclaim the VAT. A minimum quorum will be required to run the course.

For more information about this course, contact us at [support@badleys.co.uk](mailto:support@badleys.co.uk) or phone +44 (0) 1790 753472.

*Our last in-house training course was well attended.*

### Provisional course contents:

- Building the Structural Framework - creating fault surfaces, polygons, horizon surface modelling.
- Stratigraphic Infill Modelling - using the well editor, creating isochores.
- Modelling surface attributes - modelling fault and horizon surface attributes, display methods.
- Using the Fault Statistics utility.
- 3-D Fault Seal Analysis - algorithms & processes, multiple well curves, detailed reservoir stratigraphy, fault seal calibration & estimating column heights.
- 1-D Fault Seal Analysis - using the Triangle utility.
- Geo-mechanical Analysis - using the StressTester module to evaluate the risk of fault reactivation.

## Fault-Seal Analysis Course (6-7-8th November 2007)

Badley Geoscience Ltd. are offering a 3-day Fault-Seal Analysis course in our offices in Lincolnshire from the 6th to 8th November.

The total cost of this 3-day course is £1000 + VAT (17.5%) per person. For more information, please visit our website [www.badleys.co.uk](http://www.badleys.co.uk).
